

Think
the intelligent network solution

We listen to you

technology in action

Why Think

You can count on Think Network Technologies to provide you with the right technology solution for your business needs. Our reputation is built on unparalleled expertise and customer service, creative solutions and enjoyable client experiences. We can address any of your technological needs, as our certified consultants are skilled in design, implementation and maintenance in all aspects of IT systems.

- Intelligent Phone Systems
- Email Management
- Internet Connectivity
- Virus Protection
- Disaster Recovery
- Web Site Design
- Spam Management
- Security

The Certification Advantage

Certifications are significant in the world of Information Technology, because they demonstrate the highest levels of expertise and competence in a professional's specialty areas. Think Network Technologies employs experienced network engineers who have earned advanced certifications in IT, most notably with Microsoft, Cisco and Novell. These certifications prove that our engineers have mastered the skills required to administer and troubleshoot the technologies that we support and install. Our engineers are always actively involved in the latest training processes, so please ask us about our latest certifications.

Microsoft: MCP, MCSA, MCSE, MCPS, MCDBA, MCNPS, MCPSI

Cisco: CCNA, CCNP, CCIE, CSE, CCDA, CCDP, CCSP

Novell: CNA, CNE

"Think Network is honest, responsive and communicates well, and believe me, I didn't think I'd ever find an IT company with people who could actually communicate. Think's people actually listened to me and were up front about everything. If they didn't know the answer, they would say so and then go and research the issue until they could come back with an answer. That kind of interaction is music to my ears."

YOUR THINKING PROCESS

SHOULD INCLUDE A TECHNOLOGY STRATEGY

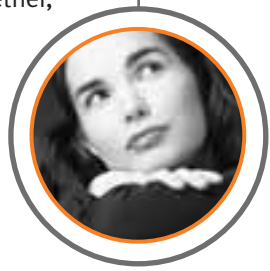

Many small businesses lack a technology strategy and simply hire service techs to fix problems as they arise...The result for the small business owner usually is a hodgepodge of technology that doesn't really work together, nor serve the business efficiently. (Mark Smith, "Technology Makeover", *Colorado Biz Magazine*, April 2004)

Your business needs a technology strategy that addresses the areas critical to efficient operation. An intelligent Strategic IT Plan by Think Network Technologies will work seamlessly in the background to enhance your daily business processes and increase your operational effectiveness. With Think Network Technologies handling your IT, you will experience greater efficiency, lowered costs, increased revenue, and peace of mind.

The Intelligent Choice is to Outsource Your Technology Solutions

"We believe the customer comes first. Our skilled and dedicated technicians will analyze your Information Technology needs and develop a strategy to meet those needs. We'll then discuss our findings in an easy to understand terminology that won't leave your head spinning."

Matt Glick
CEO, ThinkNetwork Technologies

job well done

support

Network Implementation

Our Network Implementation stage includes the following:

- Network design
- Hardware and software sales
- Wireless technology
- Video conferencing
- Email, faxing solutions, and spam management
- Data backup and disaster recovery
- Website design and hosting
- Voice-over IP (Telephone systems)
- Retail management systems (Point of sale)
- End-user training
- Security
- Server technology

Proactive Maintenance

Once your network implementation is completed, you can get all the support and guidance you need to maintain your network through Think's regularly scheduled Proactive Maintenance—it will keep you one step ahead of potential problems.

- System analysis
- System optimization
- Backup checks
- System upgrades
- Virus protection status
- Event log checks
- Security updates
- Key maintenance checks
- Hardware cleaning
- Off site data storage
- Consulting on the newest technologies

Proactive Maintenance provides our clients with peace of mind—they know their systems will not only stay running, but will consistently operate at optimal efficiency. They also know that when they need help, Think's 24/7 support is there—fast!

"I just want to say thank you to the people at Think Network Technologies for the great service we've received over the past three years. Think has consistently provided quick response times, innovative solutions and conscientious IT support services. We have high expectations regarding the delivery of technology tools to our brokers, and Think is able to provide what we need—and more."

Geoff Overington,
Broker and General Manager
Prudential Triple S Realty

A BETTER SOLUTION FOR YOUR BUSINESS

BEGINS WITH A STRATEGIC IT PLAN

Think Network Technologies coordinates all of your information technology requirements into a superior integrated Strategic IT Plan that positively impacts your business.

Your Strategic IT Plan consists of a Network Implementation stage that acquires and installs the technical solutions that work best for you, and a Proactive Maintenance stage that will keep your systems operating at optimum efficiency.

Think Network Technologies integrated solutions approach can give you all the benefits of an in-house IT department for less money, and without any of the drawbacks.

- Fast Implementation. Our extensive knowledge and quick response time means that your projects start on time and are completed on schedule.
- No lengthy learning curve. Our certified consultants can apply their experience and know-how when you need it.
- No costly IT down time. You pay us only when we're performing productive work for you.
- No added employee costs. Outsourcing means no IT costs associated with health and unemployment insurance, retirement plans, vacations, bonuses, and sick time.

Advising Translating Training

“We choose to partner with Think because they are an independent company that can function as an advisor, translator and trainer to our organization. When we selected our enterprise software, Think helped us to draft our requirements and implement a solution that saved us money and greatly increased our overall efficiency. Their input and guidance has been very beneficial to the leadership of New Country Auto Center.”

*Tom Ondrako, CFO
New Country Auto Center*

HOW THINK WORKS FOR YOU

TOGETHER WE ARRIVE
AT THE BEST SOLUTION

Think Network Technologies evaluates the network and technology supporting your business processes, listens to your needs and goals, and then strategizes with you to achieve the best solutions for your business. Our Strategic IT Plan will provide you with the guidance and support you need to run your business at an optimum level.

- We provide all of your IT support, or we work with your existing IT staff whether it's one person or an entire department.
- We train your existing IT staff.
- We maintain and protect your information system to ensure that it stays running at maximum efficiency.
- We help you consolidate and simplify re-occurring technical expenses that affect your bottom line.
- Our in-depth analysis of your business practices enables us to optimize work flow process efficiency.
- Our services can grow with you as your business expands.

Reliable
Knowledgeable
Cutting edge solutions

“We have experienced substantial growth over the last few years and Think has played a vital role in allowing us to secure our network infrastructure to support this growth. The real advantage is that I am able to augment my IT staff with their knowledgeable technicians as needed, and I can count on them to assist with cutting edge initiatives such as our recent migration of servers to a co-location facility in Denver and a wireless voice and data bridge to our new location here in Durango. They’re great people who do great work.”

*Dan Osby,
VP Information Technology
Lore International Institute*

We're Wired

proactive thinking

“Think is very responsive and has customized our information system to fit our changing needs. They are always looking for more efficient ways for the hospital to use its network. Some of our employees have limited capacity with technology and Think has given them the assistance and training they need. Think assesses our needs on an ongoing basis and make regular recommendations to us. Think set up our network, phones, email, and pda so well that I can be in contact anywhere at anytime.”

solutions

“We solve your IT problems by starting with a comprehensive strategy, which means we identify and discuss your technological needs. We then implement your plan, train your employees, and continue to proactively support you by maintaining, monitoring and upgrading your network. Our proactive approach helps you avoid costly or even catastrophic failures, and keeps your systems running smoothly.”
